Continuation Sheet (PTO-303)

Application No. 10/604,201

Continuation of 3. NOTE: While claims were amended to overcomeobjection, new claims were added that would require further consideration and search.

Continuation of 11. does NOT place the application in condition for allowance because: the argument is not persuasive because Sindhu was relied upon to teach also using the relative positions among pixels as spatial characteristics (to detect additional image types). Since Tashiro discloses associating different spatial characteristics with different color profiles, it would have been obvious to associate the spatial characteristics of Sindhu with appropriate color profiles (not necessarily those disclosed by Tashiro) so that more image types can be color corrected/enhanced properly. Therefore Tashiro's system will not be ruined.
